

MISSOURI COMMUNITY ASSESSMENT AND PLANNING PROCESS (MOCAPP)
GOAL SETTING – FORM I1-I37

Each subcategory coordinator is responsible for completing the goal setting for their respective category. Goal setting uses a similar process to the one used for Asset Mapping. The session is best achieved by using a flip chart and markers and assembling all of the members of the subcommittee in a room together. This time the coordinator will pose a different question, which will lead the members to express their ideas for improvements or enhancements to the community's current situation. The concentration of effort is on the specific subcategory. Ask everyone in the room to complete the sentence. Make sure the manner in which they respond creates a complete, grammatically correct sentence. These are "goals."

Continue to list responses until the group has exhausted all possibilities. As long as it is related to the subcategory, it is fair to include. Make sure everyone participates. Stay focused on the relevant assets of the category and repeat the question as often as it takes. Copy the items found on the flip chart paper to the space provided on this form.

GOAL SETTING QUESTION

In one to three years time, our community will have even better opportunities, access, and benefits from _____ (enter subcategory title) specifically because we will then have _____ (complete the sentence).

List:

***IMPORTANT - Before you proceed:** Mark each goal with Year-1, Year-2, or Year-3. An evaluation of the complexity of the goal should guide you to determine how long it would take you to accomplish it if a plan were put in place.
